

This is what our Gather Town space looks like

With lots of different sections where you can walk from one to the other.

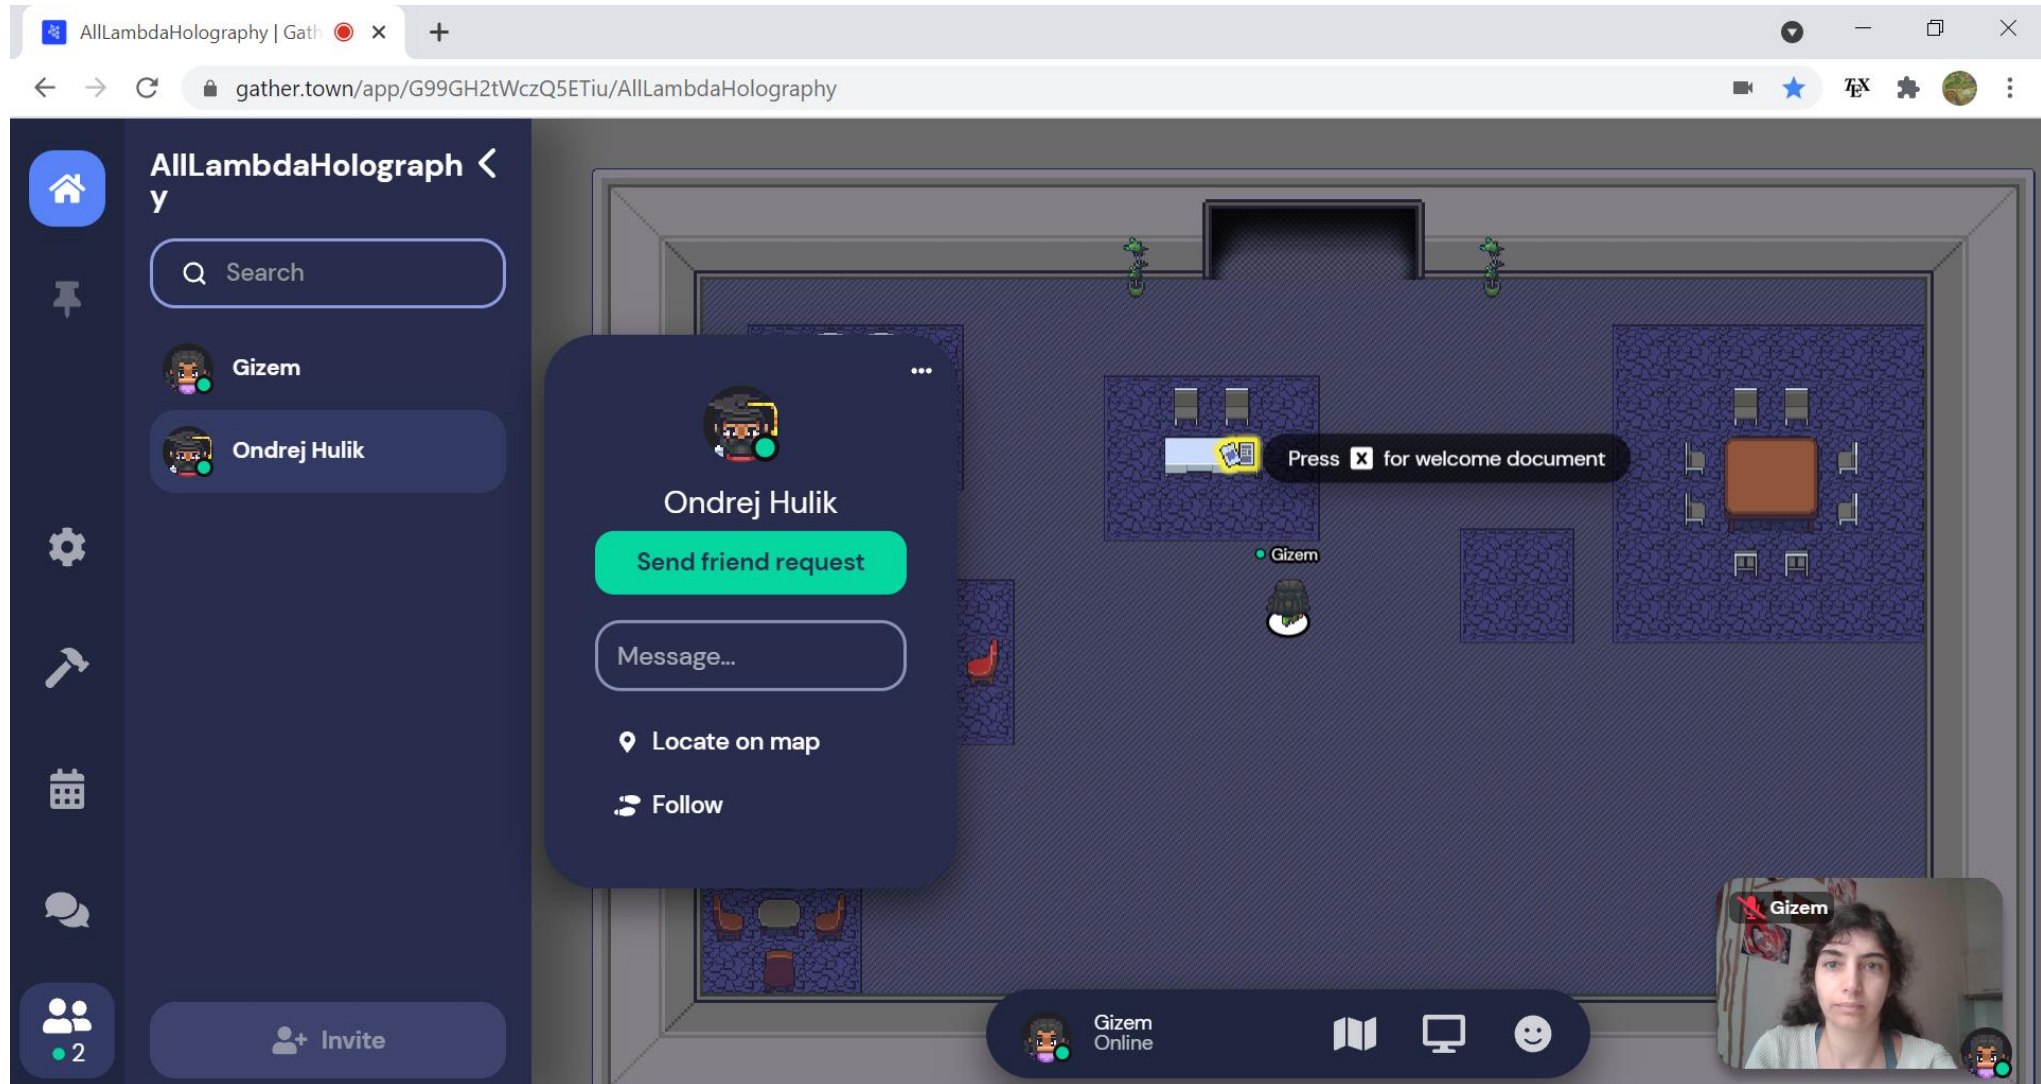

When you sign in you will be asked to create a character first

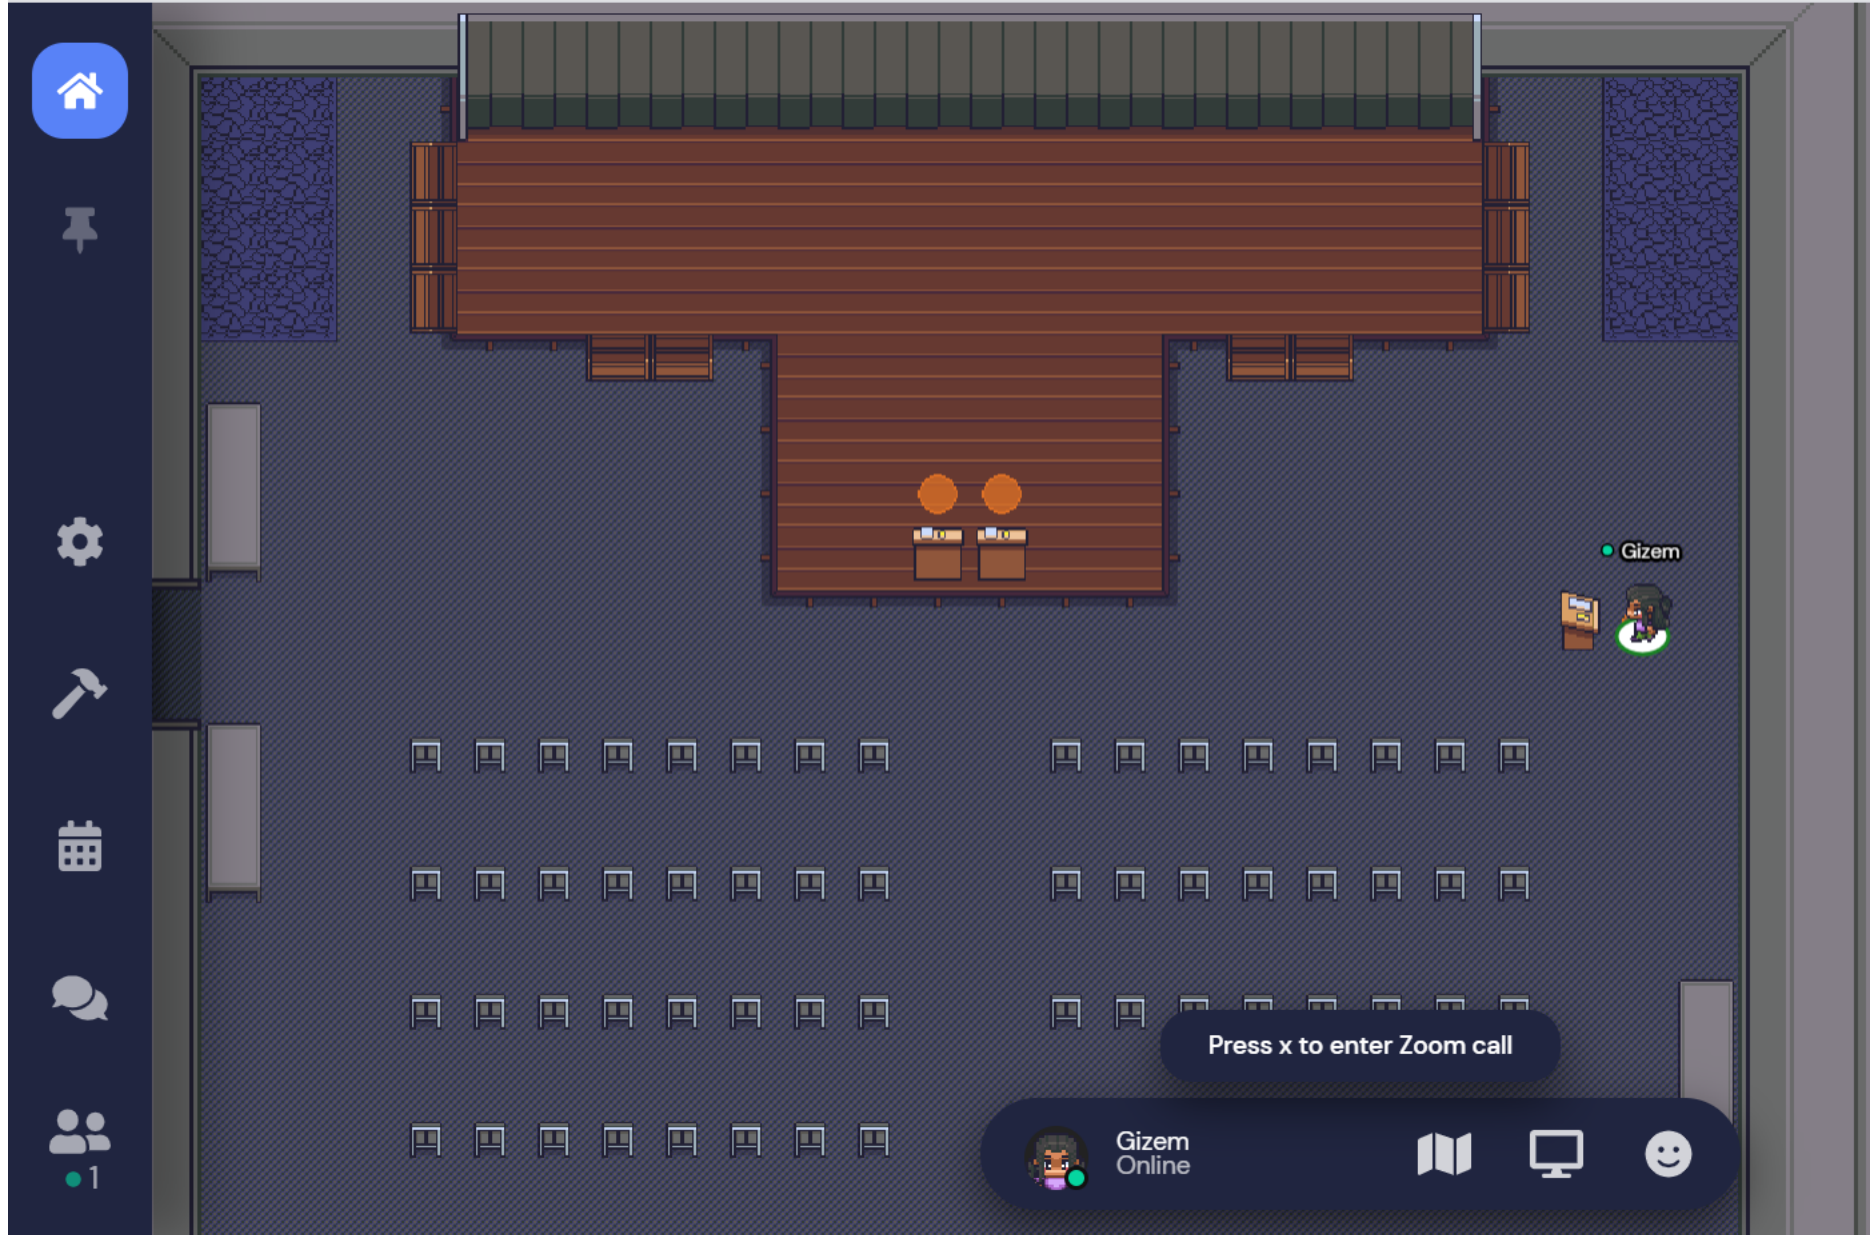

Once you are in Gather Town,
You can only hear and see the videos of [those close to you](#).

If you want to have a conversation with someone, you must stay in one
place.

You can locate other participants,
go to them, message them or message everyone simultaneously

You will see that different sections accommodate different features

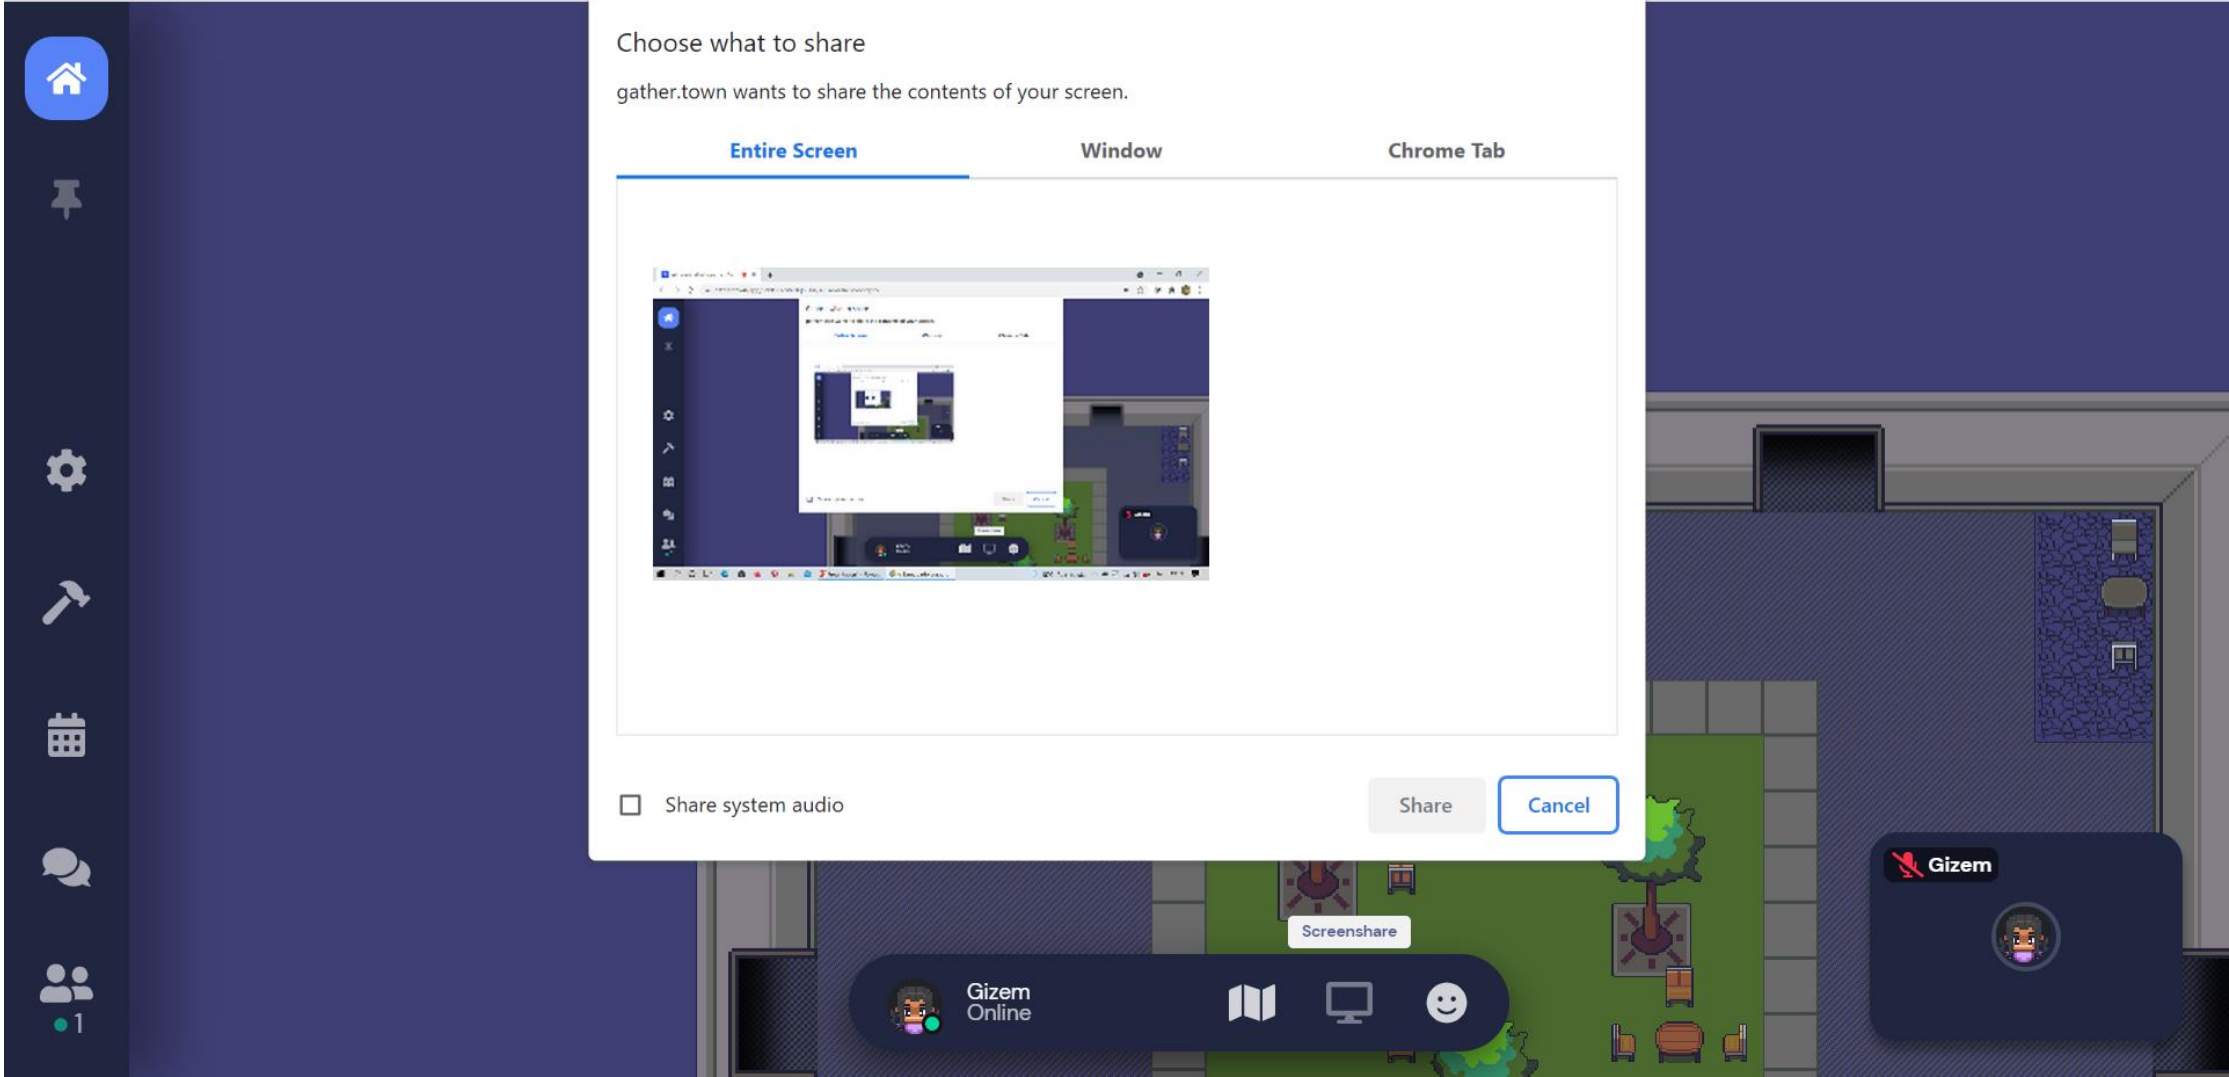

From certain locations in the auditorium

You can enter the Zoom call

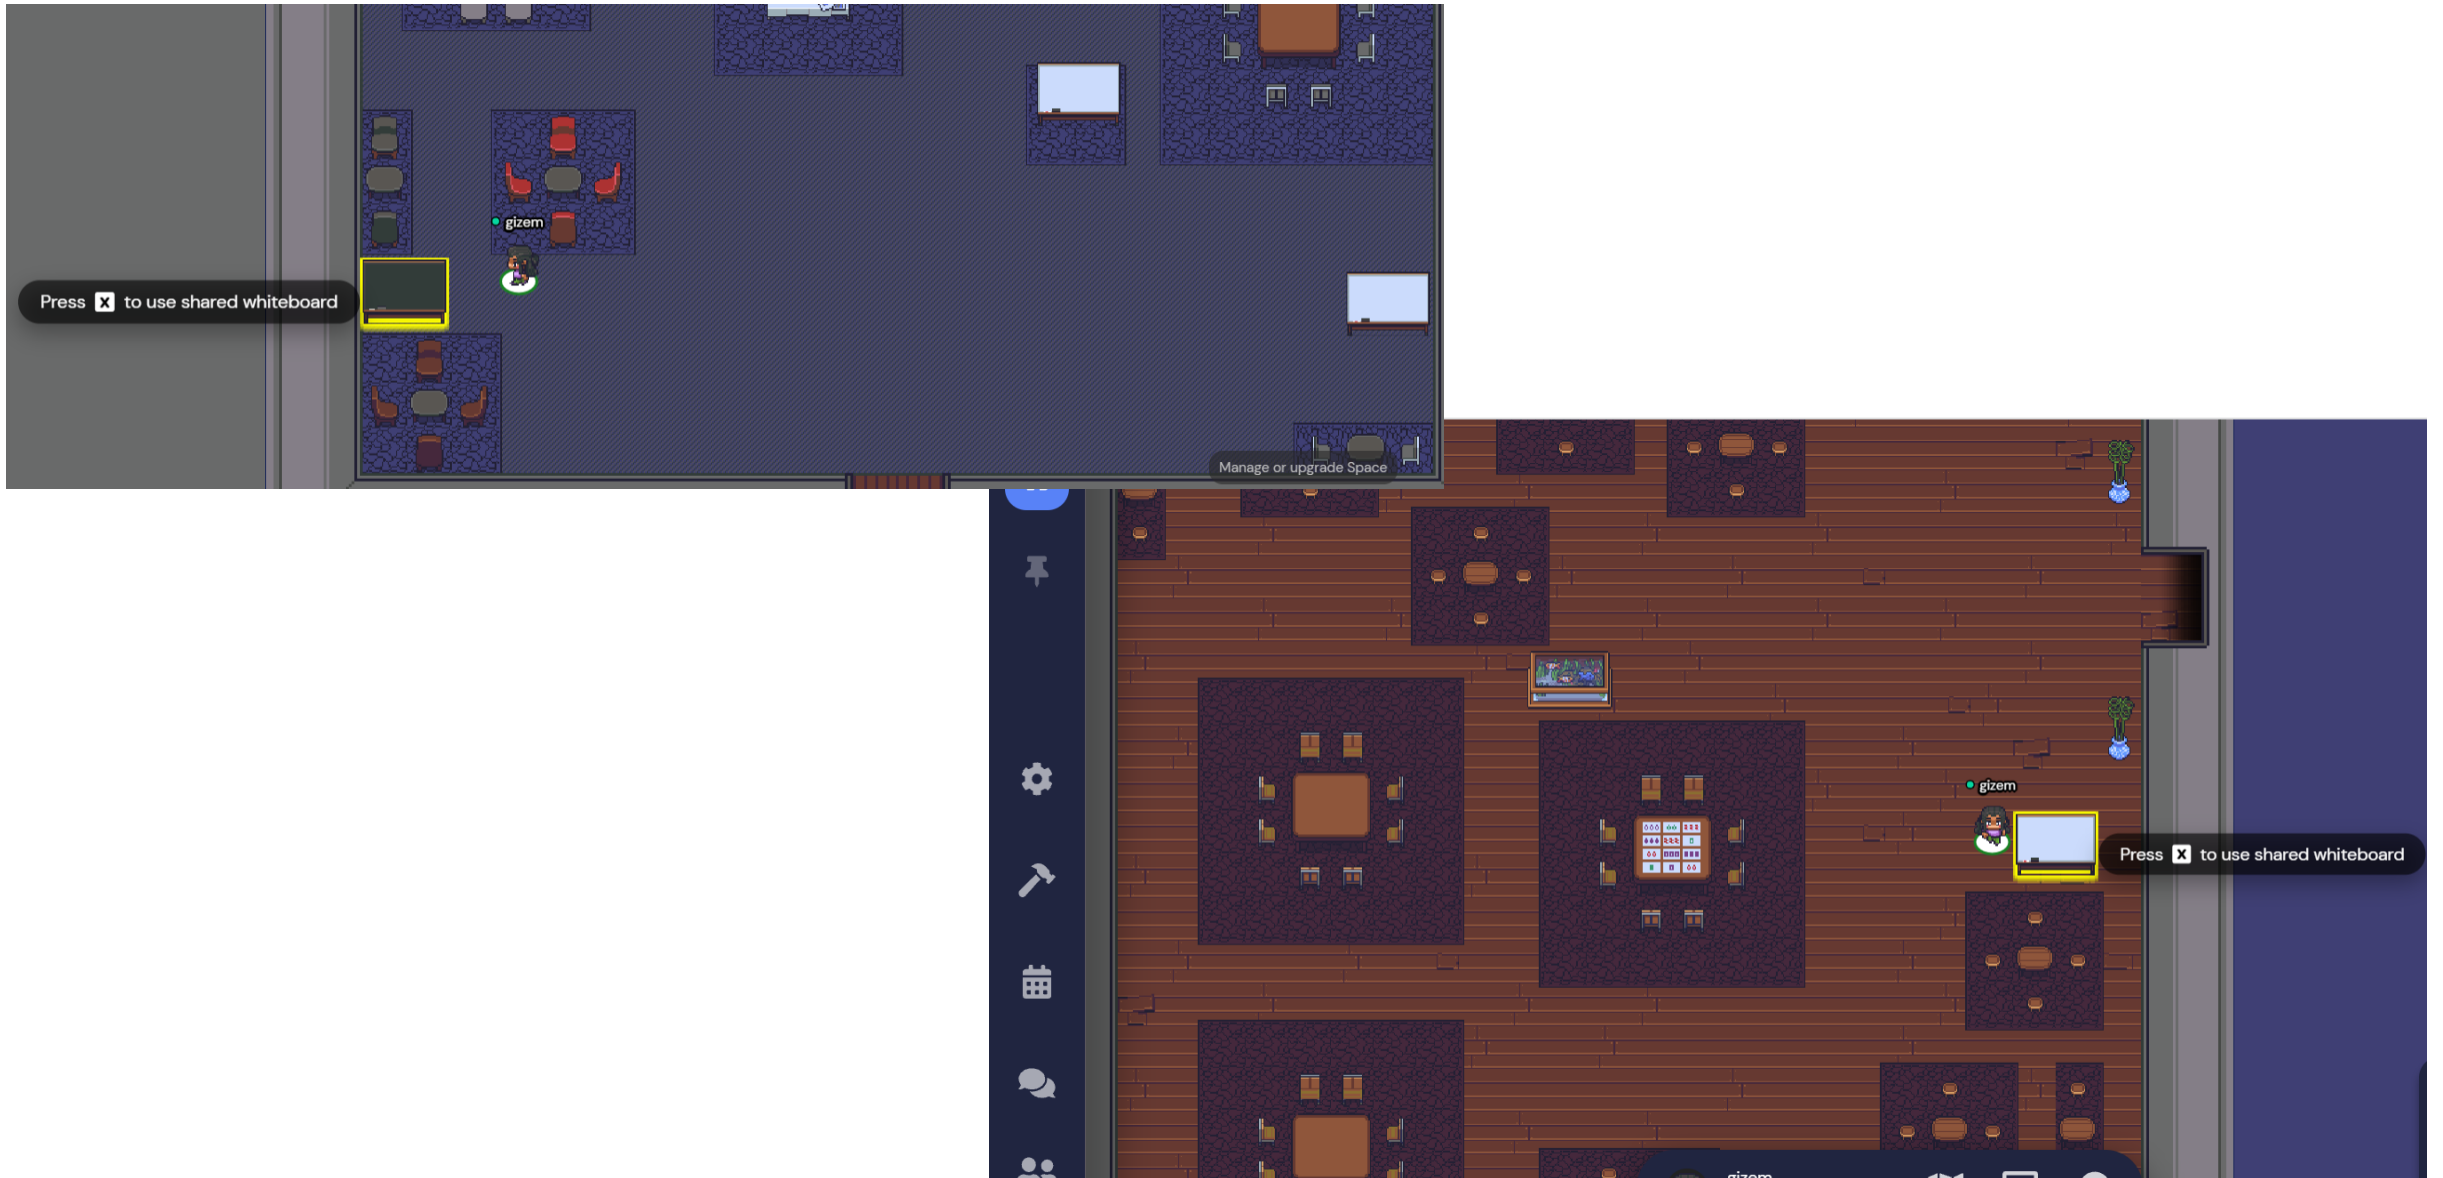

Or

make an announcement to the rest of the room

At any point you can share your screen

There are boards you can write on, scattered around in various locations

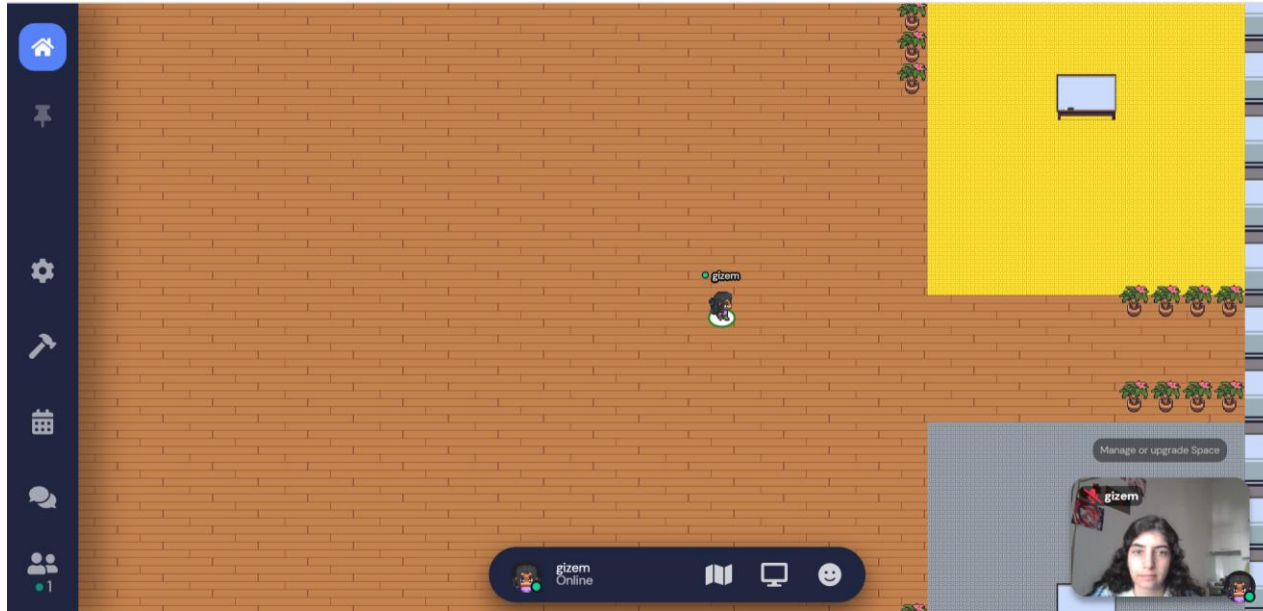

There also exist private spaces, marked by cobble stoned flooring

This means
people outside of
the cobble stoned
area cannot hear
the people inside

In the room “4 corners for discussion” we have created four private spaces, each with a long ranged board and sound insulation around, marked by coloured flooring.

This room is actually quite huge, don't be alarmed if you cannot see all of it from a single point.

For more information on the available features, you can always consult the welcome document in the foyer.
